June 10, 2024

TO Representative Amanda Nedweski  
Room 7 West, State Capitol

FROM: Al Runde, Assistant Director

SUBJECT: 2024 Estimated Utility Aid Payments and Per Capital Payment Limitation

As requested, the attachment to this memorandum provides the Department of Revenue's estimated 2024 utility aid payments to be provided to local units of government with utility property. These amounts include all of the components of the utility aid formula described in this memorandum.

You also requested information on the per capita aid limitation as part of the utility aid distribution formula. The utility aid distribution formula is based on three types of qualifying properties owned by public utility companies: electric substations; general structures, such as office buildings; and power production plants. Two of the primary utility aid formula components are calculated based on the net book value of substations and general structures, as well as the generation capacity of power production plants. Aid on substations and general structures is computed by applying a mill rate to the net book value of the qualifying utility property and depends on the type of municipality where the qualifying property is located. Payments to cities and villages are computed at a rate of six mills (\$6 per \$1,000 of net book value), while payments to towns are computed at a rate of three mills.

Capacity aid calculations for production plants are based on the generating capacity of these plants. Payments for municipalities and counties which contain production plants are calculated at the combined rate of \$2,000 per megawatt of the plant's name-plate capacity. If the production plant is located in a city or village, the municipality receives two-thirds of the resulting payment, and if the plant is located in a town, the town receives one-third of the resulting payment. The county receives either one-third of the resulting payment if the production plant is located in a city or village, or two-thirds of the resulting payment if the production plant is located in a town

Combined payments under the net book value formula and the capacity-based formula cannot exceed a maximum of \$425 per capita for municipalities or \$125 per capita for counties. For the 2024 utility aid estimates, the per capita limitation would be applied to three municipalities: the City

of Alma (Buffalo County), the Village of Cassville (Grant County), and the Town of Two Creeks (Manitowoc County). The per capita payment limitation would not apply to any county in 2024. Very few, if any other municipalities or counties are near the per capita limitation. As an example, if the per capita aid limitation would equal 75% of the current per capita amounts (\$318.75 for municipalities and \$93.75 for counties), only two additional municipalities (the Town of Christiana in Dane County and the Town of Eden in Iowa County) and no county would have had their payment limited associated with the per capita limitation in 2024.

In addition to the net book value and capacity aid payments, the amounts shown in the attachment also include other components of the utility aid distribution. Municipalities and counties also receive as part of their utility aid distribution incentive aid payments equal to: (a) a \$900 per megawatt of nameplate capacity associated with non-nuclear powered generation of at least one megawatt, or baseload generating facilities with a nameplate capacity of at least 50 megawatts; (b) a \$1,500 per megawatt of name-plate capacity if the production plant has a name-plate capacity of at least one megawatt and derives energy from an alternative energy resource; and (c) a \$1,000 per megawatt of nameplate capacity if the production plant has a nameplate capacity of at least one megawatt and the facility is a cogeneration production plant, defined as an electric generating facility that produces electricity and another form of thermal energy, including heat or steam, that is used for industrial, commercial, heating, or cooling purposes. Also, municipalities where spent nuclear fuel is stored receive an annual payment of \$50,000. Finally, payments are also extended to municipalities and counties containing production plants that were previously exempt from general property taxes and are decommissioned or closed.

AR/lb  
Attachment
