

# BEEF GRAZING DEMONSTRATION

**THURSDAY, JULY 31ST  
5-7 PM LINK FAMILY FARMS  
DEERFIELD, WI**

**Join us at Link Family Farms for an in-depth look at rotational grazing and integrating annual crops into your grazing system!**

Hosted by Glacierland RC&D, this event will showcase how the Link family uses intensive rotational grazing to improve pasture productivity, support soil health, and boost livestock performance. We'll also explore how grazing annual crops such as sorghum-sudangrass and brassicas can extend your grazing season and fill forage gaps.

Whether you're new to grazing or looking to refine your system, this is a great opportunity to see proven practices in action and connect with other local graziers.
