#### Thursday, May 30, 2013

The Jefferson County Highway Committee and Infrastructure Committee met on Thursday, May 30, 2013, at 8:30 A.M. for a joint meeting at the Jefferson County Courthouse, Room 202.

#### **ROLL OF THE HIGHWAY & INFRASTRUCTURE COMMITTEES:**

Members Present: Ron Buchanan; George Jaeckel; Al Counsell; Blane Poulson; Glen Borland; Donald

Reese; Richard Jones; Russell Kutz; Dick Schultz

Members Absent: Rick Kuhlman

Also Present: William Kern, Highway Commissioner

John Molinaro, County Board Chairperson Brian Udovich, Highway Department Ann Jenswold, Highway Department Erik Coonen, Highway Department Greg Winter, Highway Department Russ Cooper, Highway Department

Kathi Cauley, Interim County Administrator

Phil Ristow, Corporation Counsel

Walt Christensen, County Board Supervisor Greg David, County Board Supervisor James Braughler, County Board Supervisor

Ed Morse, County Board Supervisor Pamela Rogers, County Board Supervisor Jennifer Hanneman, County Board Supervisor

Jim Mode, County Board Supervisor

Matthew Foelker, County Board Supervisor Paul Babcock, County Board Supervisor Carlton Zentner, County Board Supervisor

Brian Lamers, Finance

Norman Barrientos & Staff, Barrientos Design Lydia Statz, Daily Jefferson County Union

Purpose of the meeting was to discuss preliminary design development of the new Highway main facility with Barrientos Design

#### PUBLIC COMMENT

• County Board Supervisors Zentner and David shared concerns regarding the size and energy efficiencies of the new facility, as well as group meeting involvement.

HIGHWAY & INFRASTRUCTURE COMMITTEE MINUTES: The minutes from the May 1, 2013 Highway Committee/Infrastructure Committee joint meeting, having been distributed in advance, it was moved by Mr. Reese and seconded by Mr. Jones from the Infrastructure Committee to approve the minutes as printed. Motion Carried. It was moved by Mr. Poulson and seconded by Mr. Counsell from the Highway Committee to approve the minutes as printed. Motion Carried.

#### 7. Communications

NONE

#### 8. Discuss preliminary design development of the new Highway main facility with Barrientos Design.

Norman Barrientos gave his first presentation of three regarding the new Highway main facility. This presentation revolved around the following facility areas: Repair Bay; Welding Bay; Parts Storage; Fleet Parking; Carpentry & Sign Area; and Truck Wash Area.

During his presentation, he used Manitowoc County Highway, Door County Highway, and Calumet County Highway departments for comparison.

There was discussion from the Committees and County Board Supervisors regarding the number of trucks to be stored in heated storage vs. cold storage, how to park the vehicles, protection of equipment investment, and whether to build a concrete vs. metal building, during the Fleet Parking portion of the presentation.

Discussion on different types of cranes, number of bays, and square footage was discussed during the Repair and Welding Bay portion. It was stated by Barrientos that the welding area by code, needs to be a totally separate area. He also addressed ventilation concerns for the area.

Square footage and regional sign work that Jefferson County does, was discussed during the Carpentry & Sign Area.

There was discussion on layout, security, vendor approach and delivery, and inventory access during the Parts Storage portion of the presentation.

The Truck Wash Area discussion revolved around the positive and negatives concerned with having a manual vs. automated wash system in place.

Commissioner Kern handed out a benchmark analysis of central highway facilities for comparison purposes. He stated that possibly the Committees, as well as interested County Board members, should tour some of the newer Highway facilities listed.

| 9. | Set next | joint meeting date and | possible agenda items. |
|----|----------|------------------------|------------------------|
| -  | OUT HULL | joint meeting ante and | possible agenda items. |

The next meeting will be held at the Jefferson County Courthouse, Room 202, on Wednesday, June 12, 2013 at 6:30 p.m. The following meeting is tentatively set for July 18, 2013.

| It was moved by Mr. B Motion Carried. | Buchanan and seconded by Mr. Borland to adjourn at 11:00 a. | m. |

Add Alternates

Automatic vehicle wash system 1 ea \$170,000.00 \$170,000.00

(Building costs include space for the system)

# Jefferson County Highway Department Joint Committee Meeting

July 17, 2013

Barrientos Design & Consulting, Inc. Norman Barrientos, AIA Ryan Thacker, AIA

#### **Programming Agenda**

- 1. Recap of Recent Work & Last Meeting
- 2. Cost Estimate Review
- 3. Site Layout
- 4. Building Layout
  - 1. Admin, Staff Support
  - 2. Parts Storage
  - 3. Specialty Shops (Welding / Fabrication, Carpentry / Sign)
  - 4. Repair Garage
  - 5. Fleet Parking
  - 6. Truck Wash
  - 7. Metal Building vs. Precast Concrete
- 5. Sustainability
- 6. Moving Forward
  - 1. Schedule
- 7. Approvals

#### **PROGRESS REPORT**

- Worked with users to design spaces based on equipment requirements and clearances.
- Met with equipment representatives to determine equipment requirements.
  - Fueling System.
  - Salt Dome.
  - Salt Brine System.
  - Overhead Cranes.
  - Vehicle Exhaust.
  - Bulk Fluids System.
  - Vehicle Lifts.
  - Truck Scale.
- Reduced the building foot print while balancing operational requirements.
- Designed Site based on operational and storage requirements.
- Met with City of Jefferson engineering office to determine requirements for plan approval.

#### COST ESTIMATE OVERVIEW

BARRIENTOS

#### **PLANNING ISSUES**

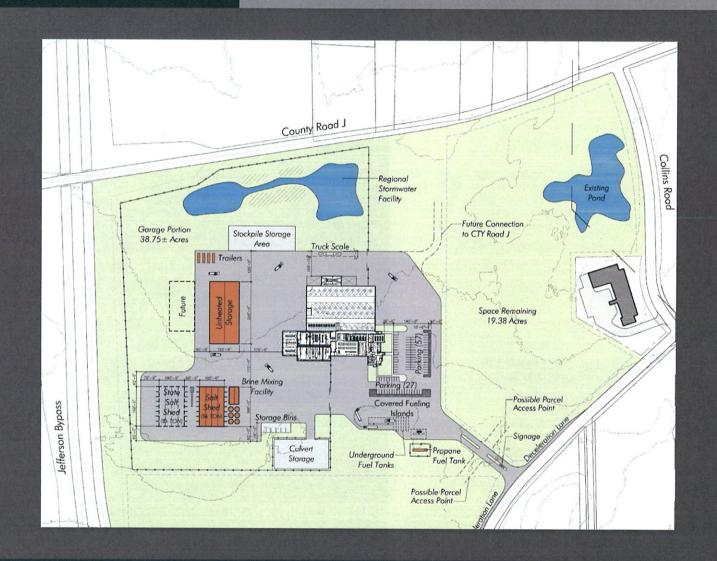

#### Planning Issues

- Future access for remaining parcels
- Access Road Design
- Traffic impact at CTH W
- Land use, Density, Setbacks
- Drainage, Wetlands
- Landscaping, Signage
- Architectural aesthetics

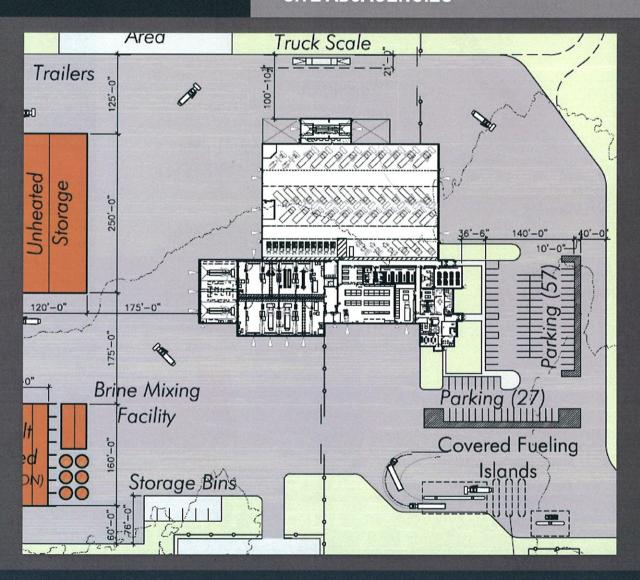

#### SITE PLAN

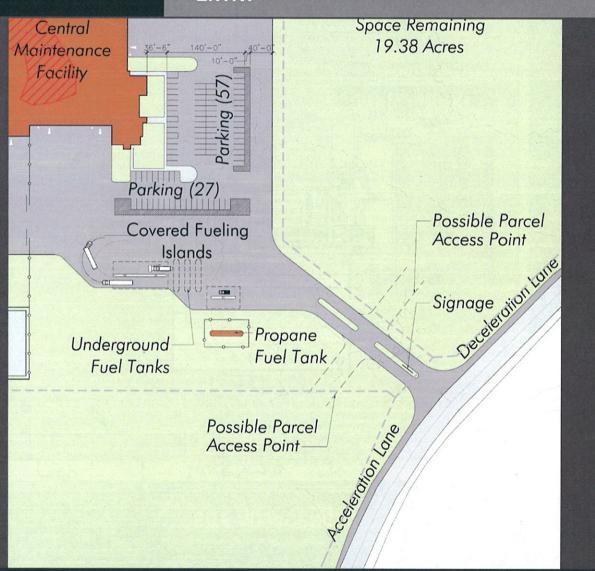

#### SITE ADJACENCIES

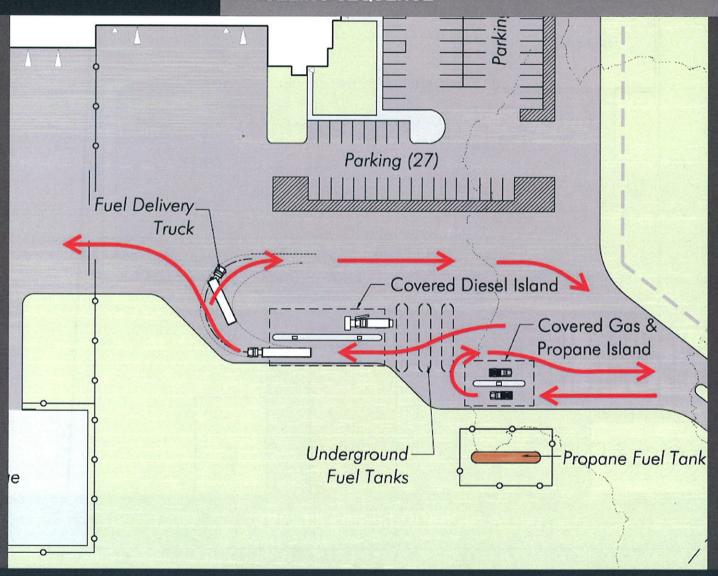

BARRIENTOS

#### **ENTRY**

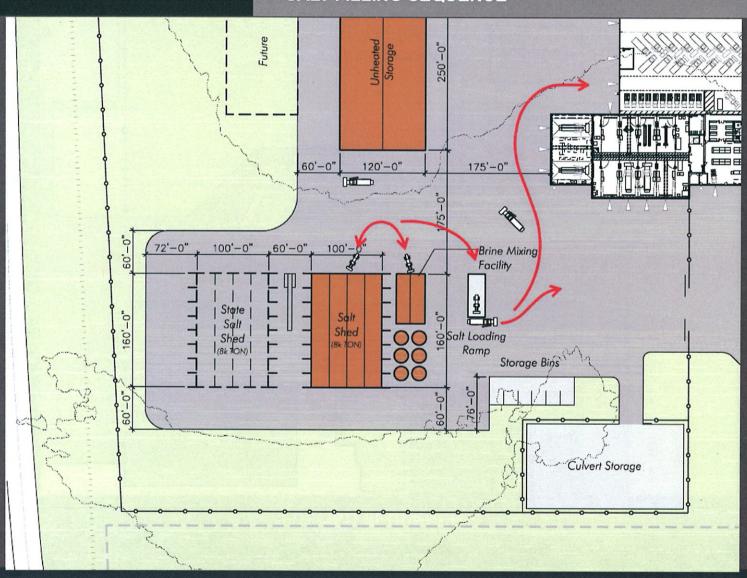

#### **FUELING SEQUENCE**

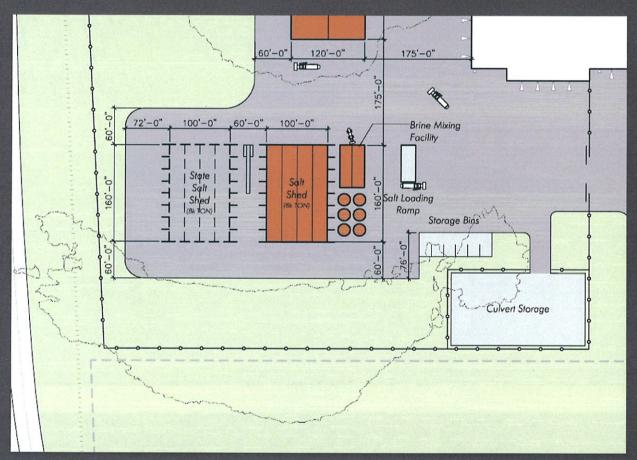

#### SALT FILLING SEQUENCE

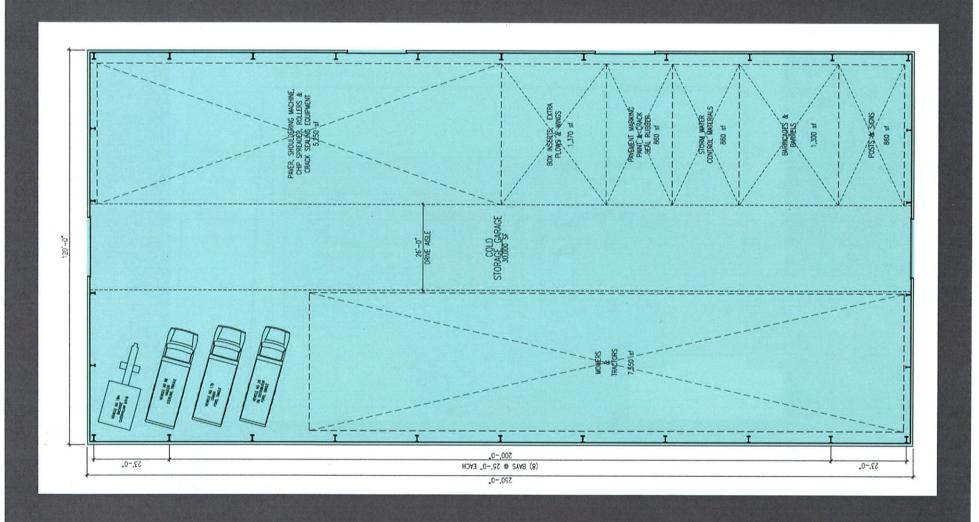

#### SITE DETAILS

Salt Shed & Brine System Layout

#### **COLD STORAGE**

#### **GRADING PLAN**

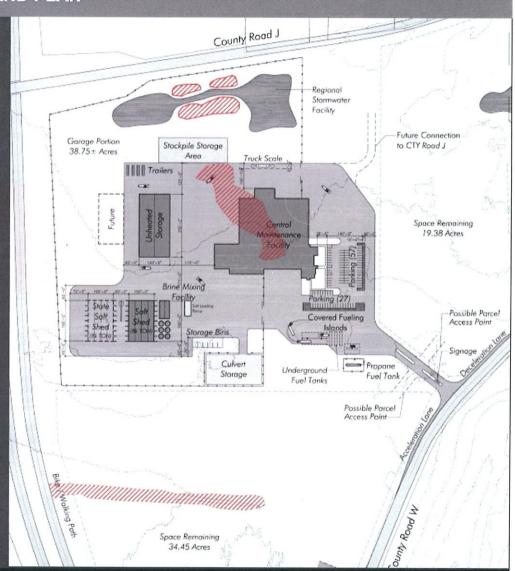

#### **WETLAND PLAN**

#### Wetland

- Delineation completed.
- Permitting process has not begun.
- Main wetland under proposed building is approximately 1.06 acres.

#### **OPERATIONAL NEEDS AND PROGRAMMING**

### **Summary of Site Functions**

| Structure/Area                   | en e | Area                 |
|----------------------------------|--|----------------------|
| Salt / Sand Shed (gambrel style) |  | 16,000 sf            |
| 8,000 tons salt, Sand in stockp  | iles                                     |                      |
| Cold Storage Building            |  | 30,000 sf            |
| Fueling Station                  | 10,000 gals diesel,                      | 10,000 gals unleaded |
| Propane Station                  |  | 10,000 gal tank      |
| Truck Scale                      |  |                      |
| 100,000 lb capacity, above gra   | de type                                  |                      |
| Asphalt Paving                   |  | 11.24 acres          |
| Heavy duty 5" asphalt            |  |                      |

## **Summary of Building Program**

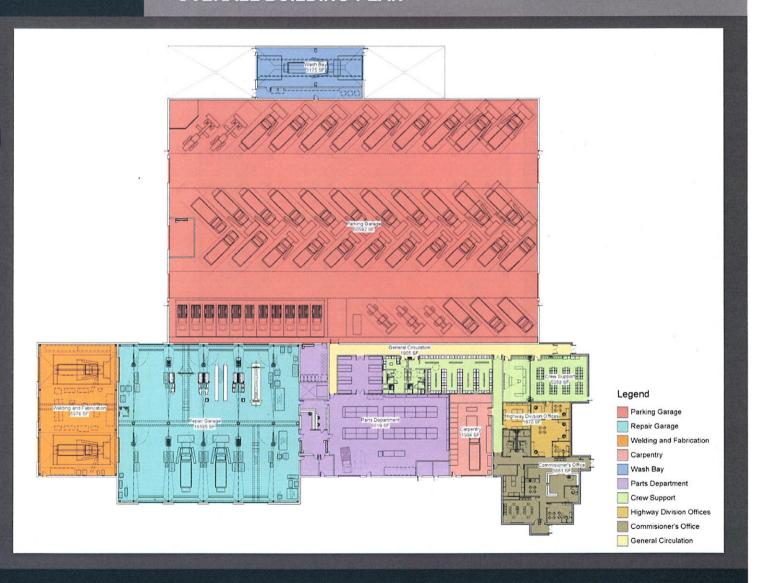

| Functional Area             | Area      | <u>%</u> |
|-----------------------------|-----------|----------|
| Heated Vehicle Garage       | 50,592 sf | 46.9%    |
| Vehicle Repair Garage       | 16,185 sf | 16.4%    |
| Welding & Fabrication Shop  | 5,976 sf  | 6.0%     |
| Sign & Carpentry Shop       | 1,984 sf  | 2.0%     |
| Vehicle Wash Bay            | 3,175 sf  | 2.8%     |
| Parts Department            | 8,619 sf  | 8.7%     |
| Crew Support                | 6,963 sf  | 7.1%     |
| Highway Division Offices    | 1,670 sf  | 1.7%     |
| Commissioner's Office Suite | 3,661 sf  | 5.4%     |
| Total Building Area         | 98,825 sf | 100%     |

#### **OVERALL BUILDING PLAN**

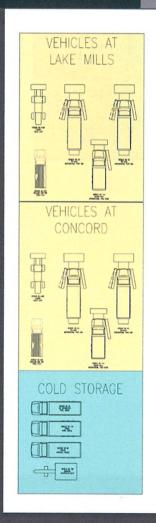

# Conceptual Building Plan

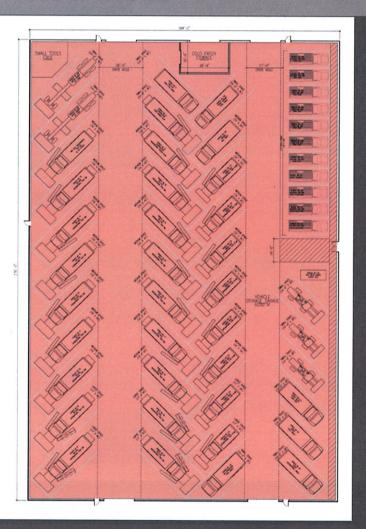

• 98,825 sf

#### **PARKING GARAGE**

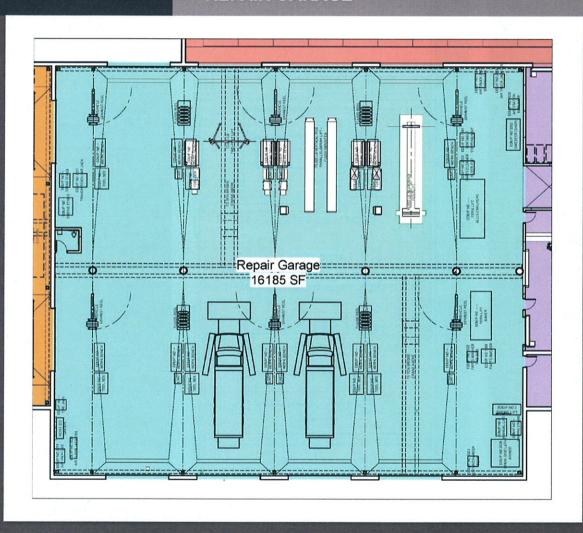

50,592 sf - 51.2% of area \$4,097,952 - 46.9% of cost

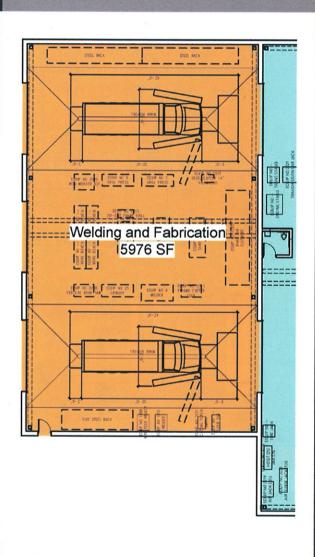

#### **REPAIR GARAGE**

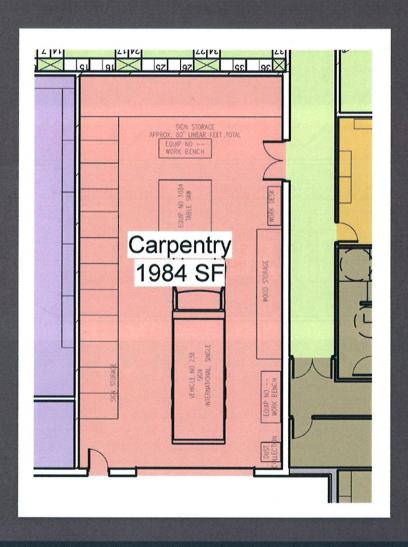

#### **WELDING AND FABRICATION**

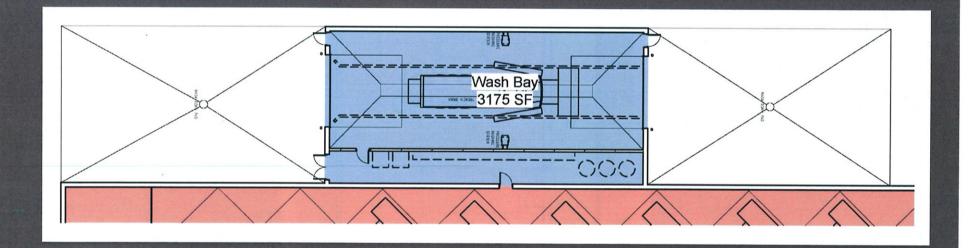

#### **CARPENTRY**

#### WASH BAY

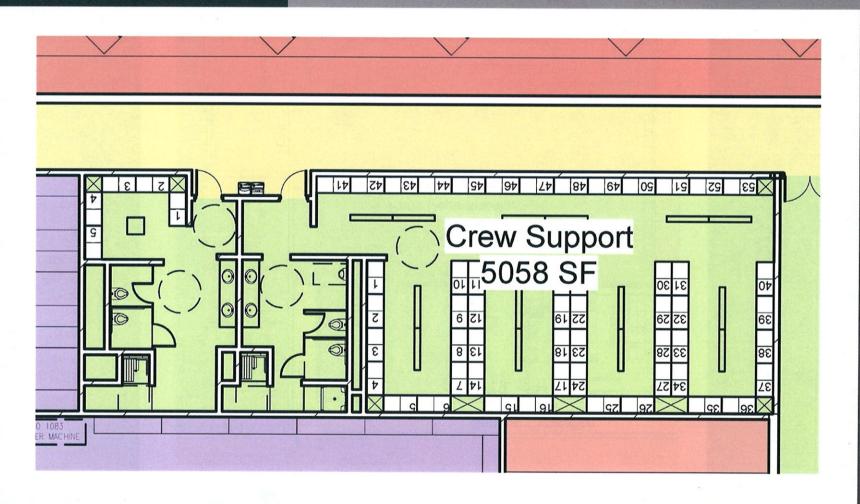

#### PARTS DEPARTMENT

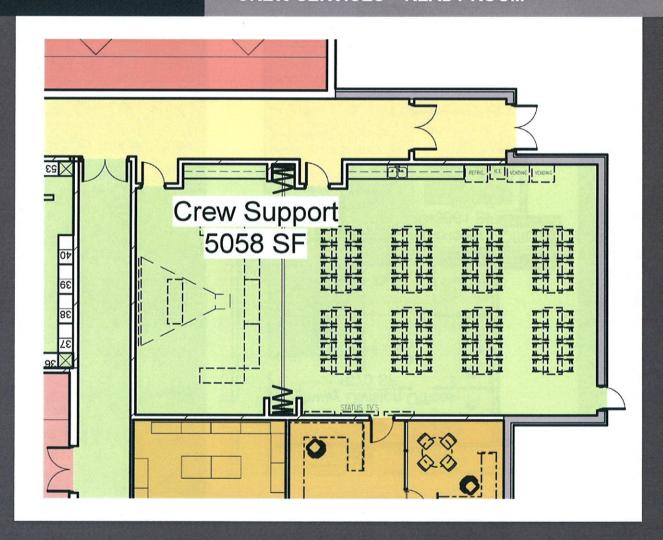

BARRIENTOS

#### **CREW SERVICES – LOCKER ROOMS**

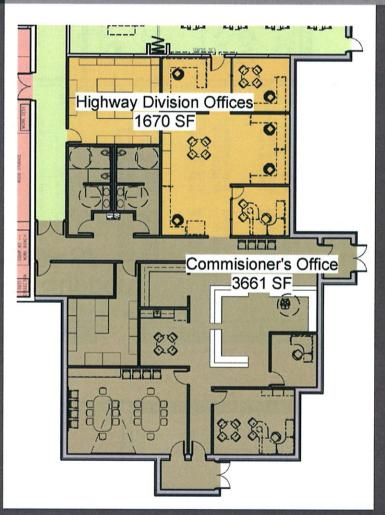

#### **CREW SERVICES – READY ROOM**

#### **ADMINISTRATION OFFICES**

5,331 sf - 5.4% of area

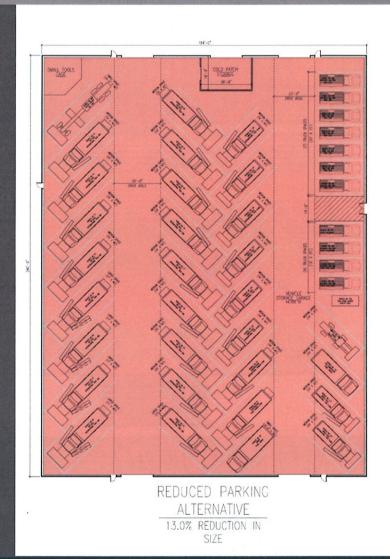

\$655,713 - 7.5% of cost

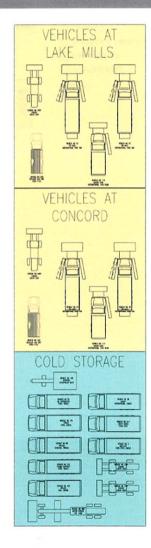

#### REDUCED PROGRAM PARKING LAYOUT

#### Reduced Program Parking Layout

- (8) Specialty trucks would be moved out to cold storage.
- Cold storage would increase 6,000 sf to accommodate extra trucks.
- Garage size would decrease by 6,432 sf (13%)
- Garage cost would decrease by \$520,992 (12.7%)
- Cold Storage would increase by \$312,000 (20%)
- Net Difference: \$208,992 savings

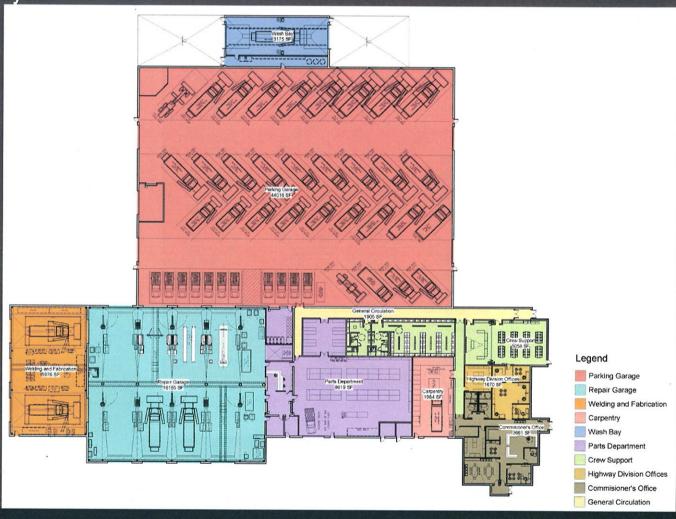

#### REDUCED PROGRAM PARKING LAYOUT

#### Reduced Program Parking Layout

• 92,393 sf

#### METAL BUILDING VS PRECAST CONCRETE BUILDING

#### **Precast Concrete Construction (Pros)**

- · Maintenance free for most of the serviceable life of the building.
- · Highly durable interior and exterior for impact and corrosion.
- Rigid insulation is "sandwiched" and will not degrade or collapse.
- · Roof insulation is typically higher with no thermal bridging.
- · Low-slope roof allows for roof-top equipment.
- Walls are structural No redundant structure where dissimilar building methods meet.
- Precast serves as a fire wall where occupancy separations are required.
- No diagonal bracing required.
- · Factory controlled fabrication.
- Lower life-cycle costs.
- · Strapping services to wall.

#### **Precast Concrete Construction (Cons)**

- More expensive up-front costs.
- · Less flexibility for exterior openings.
- Requires center columns for long spans.

#### METAL BUILDING VS PRECAST CONCRETE BUILDING

#### **Pre-Engineered Metal Building (Pros)**

- Lower up-front construction cost.
- · Quick erection time.
- Clear span over reasonable spans.

#### **Pre-Engineered Metal Building (Cons)**

- · More expensive up-front costs.
- · Large columns at perimeter.
- Requires a concrete knee wall.
- Finishes and insulation degrade faster in corrosive environments.
- · Column pads are exposed and can corrode.
- Lower insulation values and thermal bridging.
- Difficult to clean the exterior.
- Sloped roof structure is more difficult to put roof top equipment on.
- Less control over roof drainage.
- Dissimilar materials Leakage.
- Much less durable to impact.
- Redundant structure.

#### SUSTAINABILITY INTEGRATION

#### **Passive Technologies**

- · Building solar orientation and solar shading.
- Natural lighting (reduce artificial lighting).
- Energy-efficient building envelope.
- Material selection.
- · Local materials and labor.
- Rainwater collection for vehicle washing.
- Waste-oil recovery.

#### **Active Technologies**

- · Radiant in-floor heating.
- · Solar hot-water heating.
- · Geothermal heating.
- Photovoltaic arrays.

#### **MOVING FORWARD**

- Design Development Schedule
  - August 13 Board Meeting Review of Design Development
  - September 10 Board Meeting Review of Design Development
  - · City of Jefferson Plan Commission Approval
- · Committee Approvals Needed:
  - Site layout and facilities
  - Building program & size
  - Construction costs
- After County approvals, initiate the following:
  - City of Jefferson Site Development Approval Package
  - Building engineering (structural, mechanical, plumbing, electrical)
  - Site Engineering
    - Grading
    - Stormwater
  - Wetland permitting process
  - Soil borings
