DATCP REPORT
Bureau of Land and Water Resources
July 2023

Soil and Water Resources Management Grants

- 2024 budget numbers are available and we are working hard to get the Allocation together for the August Land and Water board meeting.
- Please note that many staffing awards will be lower than 2023 numbers.
- Another change in the budget was to change the source of funding SWRM has traditionally used for structural practices – or what have always been referred to as bond practices. These will now be funded with general purpose revenue (GPR) funds and will be referred to as structural practices. The allocated cost-share GPR funds can only be used on structural practices due to wording in the budget. The easiest way to think about this for contracting and reimbursements is bond = structural.

ATCP 50 Rule Revision Update

MADISON, Wis. – The Wisconsin Department of Natural Resources (DNR) today affirms that the recent decision by the Supreme Court of the United States (SCOTUS) in *Sackett vs United States Environmental Protection Agency (EPA)* does not alter Wisconsin’s wetland regulations under state law.

Since 1978, the DNR has recognized the need to preserve, protect, restore and manage the state's wetland communities because of the critical recreational, water quality, flood protection and habitat functions they provide to the public. Wisconsin was one of the first states to adopt Water Quality Standards for Wetlands in 1991 and was the first state to pass comprehensive regulations for isolated, non-federal wetlands in 2001 under 2001 Wisconsin Act 6. In a bipartisan effort, the Wisconsin governor and legislators recognized the critical functions wetlands play when they unanimously established state regulations for wetlands not covered by the federal Clean Water Act.

Under current state wetland regulations, projects that propose to impact wetlands must either request a state exemption or apply for permit authorization to complete their project. State permitting standards require projects to avoid and minimize wetland impacts to the greatest extent practicable and, in many instances, to mitigate for their wetland impacts.

“While the *Sackett* decision will likely remove federal jurisdiction and oversight from a large amount of Wisconsin's wetlands, the DNR will continue to implement the State’s uniform wetland regulatory program for projects that propose to impact wetlands in order to preserve and protect these critically important resources,” said Tom Nedland, DNR Waterway and Wetland Policy Section Manager.
