

Jefferson County Solid Waste/Air Quality Committee

February 19, 2016 - 8:00 a.m.

**Jefferson County Courthouse – Room 203
311 S. Center Avenue, Jefferson, WI 53549**

Members: Don Reese-Chair, Kirk Lund-Vice Chair, Laura Payne-Secretary, Ron Buchanan and Gregg Patrick

Staff: Rob Klotz and Sharon Ehrhardt

1. Call to Order
2. Roll Call (Establish a Quorum)
3. Certification of Compliance With the Open Meetings Law
4. Review the Agenda
5. Communication
6. Public Comment
7. Approval of Minutes – October 16, 2015
8. Discussion E-Waste Collections
 - a. Discussion with Possible Action Additional URT costs for Sites: Waterloo, Watertown, Ixonia, Jefferson, Fort Atkinson
 - b. Discussion with Possible Action Update Actions for Sites: Waterloo, Watertown, Ixonia, Jefferson, Fort Atkinson
 - c. Discussion with Possible Action Information from Refrigerant Depot, Legacy Recycling and Dynamic Companies
 - d. Discussion with Possible Action Solution for Ink Cartridge Disposal for County
9. Discussion with Possible Action-Clean Sweep Items
 - a. Year End Reports for Clean Sweeps & Donations
 - b. Town of Sumner Letter 1-11-2015 on donations
 - c. Donations Update including Walmart Gift Card
 - d. Jefferson Utilities Commission possible Donation
 - e. News release for 2016 Clean Sweep Schedules
 - f. Drugs
10. Discussion with Possible Action-Update, Deer Track Park Landfill with Don Smith
11. Discussion with Possible Action – Ehrhardt Presenting at the WIRMC
12. Discussion with Possible Action – E-waste Resolution
13. Upcoming Meeting Dates and Possible Agenda Items.
14. Adjourn

A Quorum of any Jefferson County Committee, Board, Commission or other body, including the Jefferson County Board of Supervisors, may be present at this meeting.

INDIVIDUALS REQUIRING SPECIAL ACCOMMODATIONS FOR ATTENDANCE AT THE MEETING SHOULD CONTACT THE COUNTY ADMINISTRATOR 24 HOURS PRIOR TO THE MEETING AT 920-674-7101 SO APPROPRIATE ARRANGEMENTS CAN BE MADE.

Jefferson County Solid Waste/Air Quality Committee

Minutes - October 16, 2015 - 8:00 a.m.

Jefferson County Courthouse – Room 203 311 S. Center Avenue, Jefferson, WI 53549

Members: Don Reese-Chair, Kirk Lund-Vice Chair, Laura Payne-Secretary, Ron Buchanan and Gregg Patrick
Rob Klotz and Sharon Ehrhardt

Staff: Kent Smith-Superintendent Public Works Department, Fort Atkinson; Steve Pfeiffer-Universal Recycling Technologies; Bill

Guests: Pinnow-City of Jefferson Engineer; Rick Schultz-City of Watertown Street Superintendent; Don Smith-Manager, Waste Management, Deer Track Park Landfill.

1. Call to Order

Meeting called to order at 8:00 a.m. by Reese.

2. Roll Call (Establish a Quorum)

Committee members in at 8:00 a.m. were Reese, Buchanan, Lund, Patrick and Payne.

3. Certification of Compliance With the Open Meetings Law

Klotz stated that the Solid Waste/Air Quality Committee complied with open meetings law requirements.

4. Review the Agenda

Reese explained that D. Smith had another meeting to attend and moved item 10 to item 8 on the agenda. There was no voiced objection to this request.

5. Communication

Email from Benjamin Wehmeier, County Administrator dated October 16, 2015

6. Public Comment

None

7. Approval of Minutes – September 18, 2015

Motion by Buchanan, seconded by Patrick to approve the September 18, 2015 minutes as presented.

Motion carried 5-0.

8. Discussion E-Waste Collections

a. Discussion with Possible Action Costs for Sites: Waterloo, Watertown, Ixonia, Jefferson, Fort Atkinson

Klotz explained that in the Solid Waste packet was a list of all the options talked about at the September 18 meeting and the email from Wehmeier. Klotz said the email from Wehmeier stated what viable options would be feasible: develop a user fee at disposal, County budget line items and shared funding from municipalities and Towns. Ehrhardt further suggested cutting Fort Atkinson's Clean Sweep. Klotz said a budget line item would almost be impossible at this time because of fiscal responsibility. If the County could give us \$50,000 which Department would have to give up \$50,000? Klotz said he would turn the discussion over to Ehrhardt and then to the Committee for discussion.

b. Discussion with Possible Action Solution List of Action Points from September 18 meeting including Waterloo, Watertown, Ixonia, Jefferson and Fort Atkinson

Ixonia update: They will donate \$500 for the 2015 Clean Sweep Program, \$1,000 for 2016 Clean Sweep Program and will reimburse us for any costs we incurred since July of 2015 for e-waste disposal. We have not worked out how they want to reimburse us at this time. They do not want the County to pay for the cost of e-waste and they will start charging a user fee at their site. They would also like the County to handle all the paperwork. Karaliunas said that if the County decides to have all the municipalities do their own e-waste recycling and not be involved they would like the collectors to get together and sign one contract with URT instead of individual contracts.

Fort Atkinson update: Andy Selle requested that Ehrhardt send him all e-waste certificates and invoices for this year and last year. He also wanted a copy of the URT contract. Selle is trying to understand how the program year works. Kent Smith said he was attending the meeting to get more information and see what the other collectors were doing. Fort Atkinson spends about eight hours a week to keep the site in order and cleaned up.

Jefferson update: Bill Pinnow said he was also here to listen and to gather more information. Pinnow had discussed this with a high level City of Jefferson committee. Pinnow said they would like to continue the program and had some reservation about developing a fee program. He is also concerned that if they limit hours, people will leave things at his gate. He also wanted to take back information from this committee to the next council meeting. Ehrhardt said she could send the e-waste certificates and invoices for the last two years to Pinnow. Jefferson only uses about one man-hour a week at the collection site for cleanup/organizing. They have had very few issues with broken equipment or glass at the site.

Klotz used the cost of \$50,000 a year for e-waste and divided it among all the municipalities by population this sheet was in everyone's packet. Klotz wanted to know, if each community paid their fair share of the e-waste disposal costs to the County, would it be more efficient for the County to continue with the program? Klotz said that if we can get all the municipalities to buy into supporting the program we could possibly fund the program for 2016 until the municipalities have had time to put this in their budgets. If the municipalities don't buy into the program and support it we could be in real trouble with our funds for Clean Sweep after 2016. The other question is whether using a cost to the municipalities based upon population is the correct way to cover e-waste disposal costs. If the communities took over the collections would they have to hire someone to oversee the site and to collect a fee? Are CRT glass TVs and monitors a long or short term problem? Ehrhardt asked if there was a down turn in the volumes. Pfeiffer said there has been a decrease in monitors, but not TVs. Pfeiffer said they expected two years ago that the TVs would start to decline, but they haven't seen that happen. The decline should be taking place in the next five years. Pfeiffer said he still had a CRT TV in his house too. How do we manage the cost for Jefferson County and keep the cost only to Jefferson County residents without outside municipalities using Jefferson County as a collection site. Waukesha County is doing a collection once a month and the residents are still bringing the TVs and monitors to the former sites and URT has to clean them up every other month. Dodge County does not have a program. Dane County has collection sites and you have to buy a sticker from the library to be placed on the e-waste material. Walworth County doesn't have a site and the City of Watertown is thinking about closing their site. URT does the collections for Rock County residents and residents bring them to the URT site. Patrick said if he wouldn't be on this Committee he would not have any idea of the cost of e-waste disposal. We need more education and information to get to the residents, maybe at collection events. Klotz pointed out that no matter how we handle the e-waste collections our costs will not go down. Klotz summed up the discussion saying the best option is for the County to handle the program, but how does it finance the program? Pinnow said he thinks it will come down to the County making a decision to pass the cost on to the municipalities and continue to run the program. We know budgets are tight, but the cost maybe should be passed on to the residents. Payne liked the idea that the costs would be passed on to the Solid Waste fee for the municipalities, but not sure if the municipalities can do this legally and if they need a line item to do that. Patrick said that we will need to make a decision by June. Payne agreed that we need to make a decision about the e-waste collections and we can't second guess what will happen. The municipalities need to look closely at their budgets to see if they can help with funds to solve the problem. Payne also said that they could charge a user fee for the TVs, but the problem is staffing the site for collection of the fees. Klotz suggested that we prepare a letter with a cutoff date for ending the e-waste program if we don't get their support. The letter should also have information on what the cost of recycling TVs and use City of Watertown as an example of what they do to support the program. Ehrhardt should send a copy of the letter to Ixonia and Watertown for their comments. The Committee discussed that the letter cutoff should be the end of April.

Lund left at 8:40 for another meeting. He was excused by Reese-Chair.

Buchanan made a motion to send an education letter out to the municipalities regarding our financial situation. It should include examples of what other communities are doing and request additional funds to clear out the system of CRT glass from our collection sites, requesting a response by May 1st seconded by Payne.

Motion carried 4-0.

c. Discussion with Possible Action Ink Cartridge Disposal for County

A decision has not been made on how to recycle the county's ink cartridges. A company out of Dousman (Cartridge World) would take all the ink cartridges but we would have to buy our ink from them. Roland is doing more checking. Ehrhardt said she would check with Schneider Printing Inc. to see if they will take all the ink cartridges. Pfeiffer offered to send Ehrhardt some information on recycling ink cartridges. Ehrhardt will report back to the Committee on the findings.

9. Discussion with Possible Action-Clean Sweep Summary items

- a. Discussion with Possible Action-Clean Sweep Dates for 2016 and Fair Park Inter-Office Contract for the Fair Park Clean Sweep in April.*

Ehrhardt explained that we can save money by having a Friday, April 8 night and a Saturday, April 9 morning at Fair Park, but then no Clean Sweep at Fort Atkinson. We would still have a Clean Sweep on Saturday, September 17 in Watertown and partner again with Whitewater for Friday, October 7. This will allow us to be a continuous site for the grants. Ehrhardt needs the Committee to approve the schedule changes. Ehrhardt will fill out the Fair Park contract for the April Clean Sweep and return it to them by Monday.

Buchanan made a motion to approve the four collection dates with a Friday night April 8 and Saturday morning April 9 at Fair Park, September 17 for Watertown, October for Whitewater and eliminating the Fort Atkinson Clean Sweep. Payne seconded the motion.

Motion carried 4-0.

- b. Clean Sweep Events – September 19 and October 2*

Ehrhardt had put the summaries in the meeting packet for the two Clean Sweep events. No discussion or questions.

- c. Drugs*

- (1) Discussion with Possible Action Recognition Resolution for Both Health Departments for Clean Sweep Support and Help*

Patrick made a motion to approve the thank you resolution for both Health Departments for their support of and help with the Clean Sweep Program and Ron Buchanan seconded the motion to send this to the County Board.

Motion carried 4-0

10. Discussion with Possible Action-Update, Deer Track Park Landfill with Don Smith

Smith handed out a copy of the estimated forecast host fee for 2015. The fee will have about a 4.4% increase, up from last year's increase of 2.5%. Klotz, Reese and Smith explained the host fees for the new member of the Solid Waste Committee.

Smith explained how Waste Management will handle bird flu (H5N1) at the Deer Track Park Landfill. Three egg farms in Jefferson County were under federal quarantine this spring. Fourteen states were affected with the bird flu, killing 42 million chickens and 7.5 million turkeys. The USDA does a biosecurity measure and decontaminates the sites by depopulating the birds on site and completely cleaning and disinfecting the whole site including feed, buildings, equipment and all vehicles coming and going from the site. All workers wear hazmat suits; all entrances are blocked and no one is allowed on site except for USDA and workers. At the Waste Management sites they would only take disinfected noninfectious waste. This type of waste would be from the disinfected noninfectious waste stream; that could be demolition waste, incinerated ash and maybe some noninfectious equipment. USDA will be giving Waste Management sites certificates stating the waste is disinfected noninfectious waste. Smith also said that there is no known case of the bird flu being transferred to humans.

11. Discussion with Possible Action Donation Letter

The donation letter was sent to each Committee member before the meeting. The Committee made no changes to the donation letter.

12. Ehrhardt, Discussion NEWCMG/WCSWMA Fall Conference September 30th & October 1st

Ehrhardt updated the Committee about the e-waste part of the conference. The Committee said that Ehrhardt did not have to write a summary of the conference.

13. Discussion with Possible Action-Budgets 2015 and 2016

Rob proposed no change to the budgets.

14. Upcoming Meeting Dates, Landfill Tour, and Possible Agenda Items.

Reese suggested a landfill tour for November and no meeting in December and January.

Buchanan made a motion to have a landfill tour November 13 and Reese seconded the motion.

Motion Carried 4-0

15. Adjourn

Buchanan made a motion to adjourn the meeting at 10:20 a.m. and Patrick seconded the motion.

Motion Carried 4-0

may be present at this meeting.

INDIVIDUALS REQUIRING SPECIAL ACCOMMODATIONS FOR ATTENDANCE AT THE MEETING SHOULD CONTACT THE COUNTY ADMINISTRATOR 24 HOURS PRIOR TO THE MEETING AT 920-674-7101 SO APPROPRIATE ARRANGEMENTS CAN BE MADE.

Experts Weigh in on Top CRT Glass Issues

<http://resource-recycling.com>
By: Bobby Elliott

Participants in a webinar this week spoke openly about two particularly contentious issues facing CRT glass management: downstream capacity and manufacturer funding.

The webinar, hosted by the Northeast Recycling Council's [State Electronics Challenge](#) and meant to serve as an update on the CRT recycling landscape, drew more than 450 listeners and featured presentations from Eric Harris, the associate counsel for the Institute of Scrap Recycling Industries (ISRI); Jim Levine, the president of Regency Technologies; and Jason Linnell, the executive director of the National Center for Electronics Recycling (NCER).

Speakers did not mince their words when it came to the question of whether sufficient domestic and international capacity exists to handle U.S. CRT glass and whether manufacturers are doing enough to support the industry.

While noting commodity markets "are the worst we've seen in years," ISRI's Harris told listeners it's the cost of recycling CRTs that's hurting the industry, not capacity constraints.

"There simply is a negative cost to do it right," Harris said. "The bottom line is there are ample markets that exist domestically and internationally. It's our assessment that there is unlimited capacity."

That assessment was supported by the comments of Levine, whose company currently has six operations in the U.S. Regency, he told listeners, has been able to maintain a close relationship with one of the industry's largest CRT glass processors, Dlubak Glass.

"Markets do exist. It's all about costs, not about capacity, and it's not free," Levine said. "We just need to re-train ourselves that certain materials are just going to come with a cost and we're going to have to deal with it if we want this stuff to move in the right direction."

Repercussions from India

The comments by Harris and Levine came in the wake of the largest international consumer of U.S. CRT glass closing down. As E-Scrap News [first reported](#) in October, India's Videocon announced it would no longer be accepting material as it works to restore its glass-to-glass operation.

In response, companies that have worked with Videocon for years have been forced to explore alternative markets and some have worried their options may be limited, especially within the U.S..

Linnell with NCER agreed that CRT markets exist, but he said they are not as abundant as in years past.

"The markets for CRT glass management are changing," Linnell said. "There are certain options that are going away completely."

Speakers pointed out that stockpiling and outright abandoning of CRT material is ongoing. Harris said the issue is "a growing concern" for ISRI, and Linnell estimated at least 10 to 15 abandonments have occurred in recent years and that more may be on the way.

"We do need to keep an eye out for and prepare for further abandonment cases that may come up as well as the costs that are not going down for CRT management," Linnell said.

The fact that manufacturers are expected to foot the bill for CRT management in many areas complicates the situation, panelists agreed.

According to Harris, original equipment manufacturers tasked with recycling the e-scrap stream in 25 states are choosing to work with companies that are "dramatically underestimating the cost of responsibly recycling the CRT glass."

"We have growing concerns that we've allowed one industry to basically regulate another industry without proper enforcement at the state level," Harris said.

Linnell agreed manufacturers weren't always willing to pay for the true cost of recycling CRTs.

"There are challenges with working with manufacturers or groups of manufacturers, which sometimes provide a limit on what they're willing to pay for," Linnell said.

Videocon shuts down furnaces – and stokes concerns

By Bobby Elliott, E-Scrap News

October 22, 2015

The world's only remaining glass-to-glass recycling outlet for CRTs has idled its panel and funnel furnaces in Bharuch, India for "heavy maintenance" and stopped taking CRT glass from its U.S. partner, Cali Resources, E-Scrap News has learned.

The president of Cali Resources said any glass that would traditionally head to India is being processed in Mexico for a construction-products venture between Cali Resources and its partners.

Videocon, which has relied on its glass-to-glass operation to manufacture new CRT TVs for the Indian marketplace and elsewhere, is among the largest downstream outlets for U.S. CRT glass. Last year, the company expected to consume 108,000 tons of CRT glass from the U.S. and told E-Scrap News in January it would continue to do so for the next three years.

With both the panel and funnel glass furnaces down since at least the middle of the summer and no clear timetable on when activity will start up again, the implications for the many American companies and state electronics recycling programs that rely on Videocon could be severe.

Idling furnaces

E-Scrap News first learned of the furnace stoppage through a records request filed in September with the Department of Resources Recycling and Recovery (CalRecycle) in California.

In complying with the California Public Records Act request, regulators handed over a selection of documents concerning the operational status of Videocon.

In addition to a handful of emails from brokers and processors notifying state regulators that both furnaces had temporarily shut down, requiring California companies to route glass elsewhere, E-Scrap News obtained a letter from Videocon on the developing situation, dated Aug. 21 and signed by M A Jadeja, an employee of the company's glass division in Bharuch.

"We have been performing heavy maintenance on our furnaces and cullet equipment ... It is hoped that we can resume business as usual once the equipment is deemed safe and operational," the letter states.

At the time, the company said it was continuing to take CRT glass from the U.S. at limited volumes. But E-Scrap News has learned Videocon now is no longer receiving any CRT glass from its key U.S. supplier, Cali Resources.

Carlos Kelvin, the president of Cali Resources, which supplies Videocon with U.S. CRT glass through a partnership with Glassico and Technologies Displays Mexicana in Mexico, told E-Scrap News that his company has recently been "asked to stop shipping [to Videocon] until further notice."

According to Kelvin, the company continues to receive some U.S. CRT glass but none of it currently heads to India. Instead, Cali Resources, working alongside its Mexican partners, is investing in a new CRT project related to construction products, he said.

"We expect that once maintenance on equipment is performed [in India], we will resume back to full capacity," Kelvin said. "In the event this does not happen we have already invested heavily in equipment as a contingency plan. The details cannot be disclosed due to the proprietary nature [of the project], but we have run samples and made other usable products with viable markets," Kelvin stated.

At press time, Videocon had not returned numerous requests for comment.

Truncated flows

While E-Scrap News is continuing to investigate the impacts of this slowdown throughout the country, an analysis of data from California obtained via the records request indicates shipments to Videocon by participants of the state's e-scrap program began trailing off in July.

After sending an average of 4.9 million pounds of CRT glass per month to Videocon during the first half of the year, California recycling companies sent just 3.3 million pounds there in July and only 2.4 million pounds in August, state data show.

In addition, overall monthly glass shipments downstream have been cut dramatically in the same timespan. After averaging about 8.2 million pounds halfway through 2015, that total dropped to 6.8 million pounds in July and just 2.6 million pounds in August.

Last month, responding to concerns about downstream outlets for California glass, CalRecycle permitted firms to send CRT funnel glass to hazardous waste landfills in the state.

Jeff Hunts, the manager of California's electronics recycling program, commented on Videocon's furnace idling in an interview with E-Scrap News.

"With Videocon potentially not being an ultimate disposition, it's very significant in that California recyclers who generate CRT glass need to find an alternative disposition," Hunts said. "In the context of known recycling pathways, those options are very limited."

Hunts said resorting to the hazardous waste disposal option could help, but thus far no company has reported doing so in the state. He said some companies may be holding onto glass in the absence of an established downstream vendor, which would explain why overall glass shipments in August were down by about 70 percent.

In addition, Hunts noted some of Videocon's longtime CRT suppliers would likely be surprised by the recent developments.

"It will be news to those recyclers to find out that the glass is not going on to Videocon," Hunts said. "They're going to be scrambling to find out who their options are

now."

Tip of the iceberg

Does California have no concerns about the MILLIONS of pounds of CRT glass that processors have sent to Closed Loop over the years? A company with NO CRT glass recovery capacity? Submitted by Anonymous on Thu, 10/22/2015 - 10:40.

reply

California

Yes, we are extremely concerned. Arizona DEQ is very concerned too, and they continue to closely monitor Closed Loop. The way the federal CRT Rule is written, Closed Loop is technically still within the scope of the law. It's the feds that need to tighten up their CRT Rule in order to prevent a disaster at Closed Loop. EPA Reg. 9 listens, but that's about all. Write to Reg. 9 in San Francisco and request change Submitted by Anonymous on Fri, 10/23/2015 - 08:18.

reply

No real enforcement mechanism but there is a solution

The EPA regs do not appear to have any real enforcement mechanism and they have no funding for clean up. Ohio is in the same position as Arizona and California. Closed Loop has convinced the Ohio EPA that moving material next door starts the clock running all over again. Or removing the CRT from the TV starts the clock over again. Or separating the funnel and panel starts the clock again. Eventually they will run out of things they can do to the material and then the EPA will still have no funding to do anything. The landlord will be stuck with the bill to clean up the mess and the owners of Closed Loop will walk with the fees they have collected. The certification entities that have certified Closed Loop in the past should also be accountable for some of this mess. I am afraid that, in the end, the only person paying for the cleanup will be the one person who had no idea what was going on and had no responsibility in creating the mess in the first place. Submitted by Anonymous on Tue, 12/29/2015 - 11:34.

One solution would be for the states that have approved the weight that went to Closed Loop, or any other CRT recycler who has not actually recycled the material, to go back to the Recyclers/OEMs that sent the material and require them to pick up the material and send it to a real downstream that documents actual recycling of the CRTs. In this way the cost of the clean up will actually be put on those responsible for creating the problem in the first place. The various state laws require that the CRTs in the reporting period be recycled. If it is determined that the material sent to Closed Loop during that period was not recycled, then the companies have not actually recycled the material and thus they are not in compliance with the state laws. The only way to get back into compliance would be to require the companies that are out of compliance to pay to pick up that material and send it to a proper recycler and provide actual documentation that the material was recycled. The laws that were passed were not designed or intended to require paperwork that appears to show that something was recycled. The laws were passed in order to ensure that e-waste is actually recycled.

Is there a reason that this is not being done?

City of Nixa ends medication drop-off program

Man unknowingly drops off dangerous chemical; two workers fall ill

Frances Watson, Weekend Anchor/Reporter, fwatson@kspr.com

Lance Green, Photographer, lgreen@kspr.com

POSTED: 10:15 PM CST Feb 05, 2016

NIXA, Mo. -

Last week, the Nixa Police Department was on lock down after a dangerous chemical found its way into the lobby. Friday, the department is making some changes so it won't happen again.

"The sodium cyanide that was brought to our department was in actual bottles, and it appeared to be a powder", confirms Officer Brent Forgey.

A man dropped off a few bottles of the chemical last Friday. He thought it was a good way to dispose of it. He put it in the medication drop box located in the department's lobby.

"We were actually very lucky that it, I guess, that it got jammed because then we were aware of what was in there. If me or someone else would have emptied that or taken it for incineration somewhere that would have been really, really bad. So we're glad that we were able to discover it, contain it," says Forgey.

The man who dropped it off found it in a shed on his property.

Forgey says, "I was told it was put into drills with seed, to help germinate the seed once it was drilled into the ground. There's probably more of it around than people realize."

So what should you do if you run across it?

"If you're afraid you're going to get too close, to identify what it is, then let someone else, that is trained, and may have the proper gear, so no one will get hurt," explains Forgey.

Officials say your first call should be to the fire department.

"I want to stress, especially from what happened last Friday, is know exactly what you have. Actually take the time to look at that stuff, make sure it's not hazardous to you or your family, especially kids. Just learn about some safe disposal techniques," says Forgey.

Nixa's walk-in, medication drop box program is officially done.

Forgey explains, "We realized we didn't have enough staff to make it completely safe if an incident like this were to happen again. Taking precautions now will help you better prepare for an incident in the future and that's what we looked at here."

Nixa will continue to participate in the drug take back programs sponsored by the DEA, held twice a year, usually in spring and fall.

Officials say this incident will cost the city tens-of-thousands of dollars.

The only other drop box is at the Republic Police Department. Police chief Michael Lawton tells us their drug take back program will continue for now.

**SPECIAL ONE-DAY ELECTRONICS AND APPLIANCE
RECYCLING EVENT**

Greetings!

The City of Oconomowoc will be hosting a special one-day collection of electronics and appliances open to any Waukesha County resident on Saturday, February 13th from 9:00 a.m. to noon. The collection will take place at 630 South Worthington Street.

State law bans electronics and appliances from landfills and incinerators due to the valuable materials that can be recycled and reused, including precious metals like gold and copper. Many devices also contain hazardous materials such as lead, mercury, cadmium, chromium and chemical flame retardants that need to be disposed of properly.

Items that will be collected at the event for a cash only fee include television sets (\$20 each) and Cathode Ray Tube computer monitors (\$5 each). These additional items will be collected at no fee: computers, other computer monitors, printers, keyboards, laptops, scanners, DVD players, VCRs, stereos, cell phones, telephones, air conditioners, dehumidifiers, refrigerators, microwaves, watercoolers, freezers, water heaters, washer/dryers, stoves, oven/ranges, dishwashers.

The City of New Berlin will host the next collection event on Saturday, March 12 at 3711 S. Casper Drive from 9:00 a.m. to noon.

ELECTRONICS & APPLIANCE RECYCLING EVENT

HOSTED BY

The City of Oconomowoc

Event Located at 630 South Worthington St.

Open to
all Waukesha
County
residents!

Saturday, February 13 • 9 am-Noon

Electronics (Legacy Recycling LLC)

Items collected for a fee (cash only):

- Television Sets (\$20 each)
- CRT Computer Monitor (\$5 each)

Items collected at no fee:

- Other Computer Monitors & LCDs
- Computers
- Keyboards
- Laptops
- Printers
- Scanners
- Cell Phones
- Telephones
- DVD Players, VCRs, & Stereos

Appliances (Refrigerant Depot)

Items collected at no fee:

- Air Conditioners
- Dehumidifiers
- Refrigerators
- Microwaves
- Water Coolers
- Freezers
- Water Heaters
- Washer/Dryers
- Stoves
- Oven/Ranges
- Dishwashers

Electronic Recyclables

Some of the most commonly asked questions we get at Legacy are "What items do you take?" and "What happens to all this stuff once it leaves our office?". Both are excellent questions that essentially deal with the same basic issue of keeping as much hazardous material out of the consumer waste stream as possible. Research shows that extracting raw materials from the earth takes up more energy than utilizing recycled commodities. So to help with this issue and to help answer these commonly asked questions we try and take as many different types of electronics as possible out of the waste stream. What we generally say in the industry is that if it plugs into an outlet or runs on batteries we can recycle it for you. Now, what happens to these items once they get to our warehouse is a pretty simple process but it is an essential step in the recycling chain of custody. The recyclables get separated and categorized based on factors like size or commodity variation. Items that are large have to get broken down further and items that consist of many different commodities have to get dismantled into their basic parts, such as, glass, plastic, copper, aluminum, etc. Once the electronics have been broken down the commodities are then shipped to various processors and refineries around the Midwest. At the refineries they get refined and purified into reusable raw materials where they can then be used to make new products. These products then enter the consumer stream where they begin the cycle all over again.

Milwaukee Computer Recycling, Racine Computer Recycling, Chicago Computer Recycling

What We Recycle

- Desktop PCs/Network Servers /Laptops
- CRT/LCD Monitors and Televisions
- Peripherals (Printers, Scanners, Keyboards, etc)
- Office Equipment (Copiers, FAX Machines, Phones, etc.)
- Cables, Connectors and Adapters
- Media (CDs, Floppy/Encased Diskettes, Storage Tape, etc.)
- All types of batteries (NiCd, Pb acid, Li ion, Alkaline)
- Small appliances (microwaves, toasters, vacuums, etc.)
- Consumer electronics (VCR's, stereos, DVD players, cell phones, etc.)

About U

ELECTRONICS RECYCLING

Our End of Life e-Recycling Division's primary focus is the proper processing of all electronics and materials that have been evaluated and determined to not have any further reuse value.

This division is also directly responsible for supporting our agreements with various Original Equipment Manufacturers (OEM's) in fully satisfying their specific state program obligations for responsibly recycling electronics.

It is our guarantee to you, the customer, that all of your electronic equipment and materials are recycled properly and that all sensitive information on data containing data is properly destroyed or sanitized to Department of Defense Standards.

- All whole electronic units are processed in developed countries, with detailed audits conducted by approved vendors that handle our hazardous components.
- Our No Landfill Policy ensures that all equipment and component parts will be recycled to the fullest and never disposed of in a landfill

OEM SERVICES

Dynamic Recycling has expert Account Executives dedicated to the specific needs of our OEM clients. Our dedicated team can facilitate the needs of all OEM recycling obligations assigned within specific state programs. We also follow a strict no-landfill policy and never export or outsource whole units to non-OECD countries. We have liability policies and closure plans in place to effectively minimize risk. Our robust program includes quality, complete in-house processing and comprehensive, customized reporting.

SCRAP PURCHASING

Dynamic Recycling, Competitive pricing, and flexible terms, make Dynamic Recycling's Scrap Purchasing Division, an ideal partner for your electronic and non-ferrous scrap recycling needs. It is our goal to ensure that all of the electronic scrap that we process and purchase is sent to an end-of-life facility that processes the material in the most environmentally responsible way possible.

- All vendors that handle our focus materials are audited for environmental, health and safety standards as well as material handling, and tracking final disposition of the focus materials.
- Payment terms are negotiable based on quantity, consistency and accuracy of material received per customer.

IT ASSET DISPOSITION (ITAD)

Dynamic Recycling maintains a dedicated staff of expert technicians and account executives that will accommodate the proper disposition of your IT assets that no longer support the technology requirements set forth by your organization. We can customize a strategy for your company that will maximize your ROI on found to be outdated and/or non-functional.

- We offer diverse remarketing channels through which we can resell a broad range of equipment including telecommunications, medical, networking, and consumer electronics.
- All data is sanitized or destroyed in accordance with NIST 800-88 Guidelines for Media Sanitization, Department of Defense standards (DOD 5220.22-M), and the National Association of Information Destruction (NAID) Standard of Electronic Media Sanitization Destruction.
- On-site and plant-based hard drive shredding.
- We provide a complete chain of custody on all assets, serialized tracking, and a certificate of data destruction and recycling with each load or on a monthly basis.

We ensure complete data security through our fully secure facility equipped with over 100 security cameras and restricted/key card entry. All electronics that we are unable to process for reuse, are then sent to our e-Recycling Division for processing and disassembly.

About Us

OUR MISSION

Improve the world through reuse and recycling by empowering team members to better themselves, their families, and others

OUR VISION

Dynamic Recycling's vision is to be an industry leader in providing environmentally sustainable solutions reinforced through innovation, integrity, customer relations, and stewardship; executed with passion and excellence.

Industry Leader: We strive to be among the best in whatever industry we are in. We only do business in industries that are aligned with our vision and core competencies.

Environmentally sustainable solutions: We only operate in industries that are helping to improve the environment.

Innovation: Innovation is the creation of better or more effective products, processes, services, technologies, and ideas. Our organization is driven by continually improving in all areas; our people, our processes, and our relationships. People are the drivers of our organization. We will only hire people that fit our culture and we will never settle when making personnel decisions. Our processes will be constantly evaluated and improved.

Dynamic Recycling Our organization are 6S, Lean, & Six Sigma systems. Our relationships with our customers, vendors, and community need to be constantly evaluated and improved. Serving our customers is our top priority. Without our customers we can't have a business.

Integrity: Everyone in our organization must act with integrity at all times. Integrity is the cornerstone of our values and must never be compromised. Treat other people as you yourself would like to be treated.

Customer Relations: Our customers are the foundation of our organization. We must do whatever is in the best interest of our customers at all times while acting with integrity.

Stewardship: Stewardship is an ethic that embodies responsible planning and management of resources. It can also be described as a responsibility to take care of something belonging to someone else. We are all stewards of the environment and it is our duty to take responsibility for it through recycling. We must also strive to get the most out of our time and money.

Passion & Excellence: These go hand in hand. Excellence cannot be achieved unless we are passionate about the process or the outcome. Passion doesn't have to be necessarily for recycling, but can be. Passion fuels excellence and motivation fuels passion. Passion is the inner feeling that you are making a difference in your own and other's lives and this creates happiness and fun in your work. In order for us to be a leader in any industry, we must have a passionate pursuit of excellence.

1999 No Clean Sweep

1992-2001 Alternated years between Household & Ag Clean Sweeps

2002 Combined Household, Ag, Business

2005 Electronics were add to Clean Sweeps

2007 Added Pharmaceutical to Clean Sweep and continues to take drugs at Clean Sweep also
setup up five permanent drug drop off sites

2010 Three permanent electronic sites were setup and we stop taking electronics at Clean Sweeps

2014 We added two more electronics and appliance collection sites - we now have five.

2015 Stop taking drugs at Clean Sweep Event because we have seven permanent sites.

Clean Sweep Program
Jefferson County Courthouse
311 S Center Avenue – Room 201
Jefferson, WI

Attn: Sharon Ehrhardt

Reference: 2016 Contribution Sheet

Dear Sharon

Please find enclosed a partial contribution of \$200.00 to put towards the suggested contribution based on the population of the Town to help continue the environmental effort to properly dispose of hazardous waste.

The Town Board discussed the request for contributions as well as the need for all of us to work together on this. Due to the fact this is not an item that was not budgeted for in the 2016 budget the board made a motion to contribute the \$200.00 at this time and revisit the budget in April with the intent to utilize funds from another portion of the budget to meet the Clean Sweep Program request.

Please understand the Board is “on board” with the need to keep this program going and it is planned to be an agenda item for the April meeting.

Thank you in advance for all the work you put into this program on behalf of all the Towns.

Sincerely,

Glendan Rewoldt
Clerk of the Town of Sumner

NEW CLEAN SWEEP SCHEDULE FOR 2016

Jefferson County Fair Park

Clean Sweep is Friday, April 8 and Saturday, April 9, 2016.

April 8th hours of operation:

2:00 to 3:30 p.m. is reserved for farmers and small businesses.

3:30 to 5:00 p.m. is for household residents of Jefferson County.

April 9th hours of operation:

8:00 to 10:00 a.m. reserved for household residents of Jefferson County. We will accept a small number of businesses or farmers if they can't make Friday afternoon.

VSQG businesses need to call for an appointment three weeks ahead of the scheduled event. Businesses will get a free quote per pound and will receive paper work prior to the event. Households and farmers can call up to the day before the event. Households and farmers will be charged a \$10 per vehicle fee.

Fort Atkinson

There will be no Clean Sweep events at Fort Atkinson this year. Fort Atkinson residents are encouraged to attend Friday afternoon or Saturday morning Clean Sweep events at the Jefferson County Fair Park. Fort Atkinson residents can attend the Watertown or Whitewater events if the April Fair Park event doesn't work for them.

Watertown Street Department

Clean Sweep is Saturday, September 17 at the City of Watertown Street Department; hours of operation are 8 to 10:30 a.m. Household and farmers can call for an appointment up to the day before the event. Households and farmers will be charged a \$10 per vehicle fee. We will accept small businesses and farmers.

Whitewater Public Work Complex

Friday, October 7 at the City of Whitewater Public Works Complex - hours of operation 3 to 5:30 p.m. Household residents only are allowed at this event. We ask Jefferson County residents to call ahead of time and send a \$10 per vehicle fee for the event.

Everyone must register for a Clean Sweep event. Call for your appointment or questions at (920) 674-7430.

E-waste/Appliance Recycling

E-waste (electronics) and Appliance collections sites are being reviewed at this time. The cost of recycling CRT TVs and monitors has increasee and the Solid Waste/Air Quality

Committee is working with Watertown, Waterloo, Ixonia, Jefferson and Fort Atkinson to solve the problem of cost and find an efficient and affordable process for e-waste and appliance recycling. It has cost Jefferson County Clean Sweep Recycling Program \$42,184.16 since July of 2015. The cost for recycling and shipping increased again on February 1, 2016. The estimated program cost could be up to \$150,000 for the 2016 program year. We will keep you posted on changes to the program. With questions you can call (920) 674-7430.

Two Permanent Latex Paint Collections Sites

The sites only take latex paint (water based). Oil based paint, stains, varnish, shellac/lacquer, paint thinner/solvents, strippers, marine paint and spray cans must be brought to a Clean Sweep event. Check our website or call (920) 674-7430 for Clean Sweep events and questions.

Site Locations:

City of Watertown Street Department, 811 S. First Street, Watertown

Please call the Street Department office (920) 262-4080 or stop at the office before dropping off your latex paint. Hours of operation:

Monday-Friday 6:30 a.m. to 4:00 p.m.

Ixonia Transfer Station, W1276 Elmwood, Ixonia

Hours of operation Wednesdays 2:00 – 6:00 p.m. and Saturdays 8:00 a.m. to 1:00 p.m.

We will not take latex paint at any future Clean Sweep events because we now have two sites open all year long.
